DETAILED ACTION

Status of the Claims

2. The amendment to the claims received on September 6, 2006 canceled claim 2 and amended claim 1.

The amendment to the claims received on April 25, 2007 canceled claims 23-24 and amended claim 1.

The amendment to the claims received on November 19, 2007 amended claims 1 and 16.

- The amendment to the claims received on May 7, 2008 amended claim 1, canceled claim 5, and added new claim 25.

Claims 1, 3-4, 6-22, and 25 are currently pending.

Claims 1, 3-4, 6-15, 19-22, and 25 are currently under consideration.

Previous Election/Restrictions

3. Applicants elected, without traverse, Group I (previous claims 1-15 and 19-22) in the reply filed on February 10, 2006. Claims 16-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim.

4. Due to the claim amendments, the previous species requirement is withdrawn. A new species requirement is provided below.

Election/Restrictions

5. This application contains claims directed to the following patentably distinct species of the claimed invention for elected Group I. Election is required as follows.

The applicant is required to elect a single, specific species from **each** of the following species A-B.

A. a species of first antigen (please refer to claims 4, 9-15, and 19-22)

Applicant must elect, for the purposes of search, a **single, specific species** of first antigen.

B. a species of second antigen (please refer to claims 3-4, 8-15, 19-22, and 25)

Applicant must elect, for the purposes of search, a **single, specific species** of second antigen.

For example, are the antigens of formula Ia or Ib; is the second antigen biotinylated; does the marker within the first antigen comprise a hapten; what are P, T, L, n, and/or m; is a spacer present; are the antigens multimeric and comprising multiple identical epitope regions; are the antigens recombinant; are the antigens fusion polypeptides comprising mosaic peptides; is a branching formula present?

6. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

8. There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

9. **Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

10. The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

11. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

12. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

13. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
